## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 9-14 are rejected under 35 U.S.C. 102(e) as being unpatentable by Kuwahara et al (6141335).
3. Regarding claim 9 Kuwahara et al teaches a wireless base station that transmits a control signal to a non-specific mobile station by forming an omnidirectional antenna pattern and transmits a control signal to a specific mobile station by forming an array antenna pattern, the wireless base station comprising (figs. 3-14):

a judging unit operable to, when the control signal is to be transmitted to the specific mobile station, refer to a reception condition of and a time lapse from, an immediately preceding reception from a mobile station and judge if one or both of the reception condition and the time lapse satisfy a predetermined criterion (col.2, line 50-col. 3, lines 5); and

a controlling unit operable to, when the judging unit judges in the affirmative, stop the wireless base station from forming the array antenna pattern and force the wireless

base station to transmit the control signal by forming an omnidirectional antenna pattern (col.3, lines 1-10).

Regarding claims 10 and 11 Kuwahara et al teaches wherein the control signal transmitted to the specific mobile station includes a message representing a link channel establishing request, a link channel establishing re-request, a link channel allocation request, or a link channel allocation rejection (col. 5, line 55-col. 6, lines 50).

Regarding claim 12 Kuwahara et al teaches wherein when the judging unit judges in the negative, the controlling unit controls the wireless base station so that the transmission using the array antenna pattern is performed with a raised transmission power (col. 2, lines 20-27).

Regarding claim 13 Kuwahara et al teaches wherein when the controlling unit forces the wireless base station to transmit the control signal by forming the omnidirectional antenna pattern, in a case where a reception field strength of the mobile station is high, the controlling unit controls the wireless base station so that a transmission power is lowered temporarily (col. 2, line 50-col. 3, line 10).

Regarding claim 14 Kuwahara et al teaches a controlling method to be used by a wireless base station that transmits a control signal to a non-specific mobile station by forming an omnidirectional antenna pattern and transmits a control signal to a specific mobile station by forming an array antenna pattern, the controlling method comprising (figs. 3-14):

when the control signal is to be transmitted to the specific mobile station, referring to a reception condition of and a time lapse from, an immediately preceding

reception from a mobile station and judging if one or both of the reception condition and the time lapse satisfy a predetermined criterion (col. 2, line 50-col. 3, line 5).; and

when the judgment is in the affirmative, stopping the wireless base station from forming the array antenna pattern and forcing the wireless base station to transmit the control signal by forming an omnidirectional antenna pattern (col.3, lines 1-10).

### ***Response to Arguments***

4. Applicant's arguments with respect to claims 9-14 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
